

The beginning of the United Nations (1953)

NARRATOR: Since wars begin in the minds of men, it is in the minds of men that the defences of peace must be constructed.

The world map is a map of knowledge, knowledge in Australasia, in Asia, in Europe, in Africa, in the Americas. We need the knowledge of all continents for the defence of peace in the minds of men and we find the men of all continents in the United Nations.
